

## Bondi Beach, Waverley Council

**One of Australia's most iconic beaches has just had an LED makeover to showcase its public spaces after dark.**

Empyrean Lighting recently supplied our Andromeda<sup>TM</sup> Park LED luminaires to the refurbishment of Bondi Park and Pavilion walkways. Working in conjunction with Ecosave and Waverley Council, 46 existing inefficient metal halide park lights and 26 flood lights were replaced with 150W Andromeda<sup>TM</sup> Park LED luminaires.

The project has resulted in significant reductions in maintenance costs and energy consumption and provide beautiful lighting for the stunning environment.

**LED Solution**  
Andromeda<sup>TM</sup> Park LED

**"These new LED lamps in Bondi Park & Pavilion will enable Council to save around \$15,000 from annual energy bills and avoid around 70 tonnes of greenhouse gas emissions each year. This is a great step towards our long term environmental target to reduce greenhouse gas emissions by 30% for 2020."**

**- Mayor Sally Betts**
