PANEL LIGHTS

EmpyreanTM
LIGHTING

189 Coronation Drive, Brisbane

LIGHTING ACCOUNTS FOR OVER 40% OF ENERGY CONSUMPTION IN TYPICAL COMMERCIAL BUILDINGS

Replace your inefficient fluorescent troffers with our efficient, green and safe CoronaTM LED Panels. Our CoronaTM LED Panels are aesthetically beautiful, light weight and are a modern and versatile solution for new or retrofit projects.

Say good-bye to maintenance costs, discoloured lights and the annoying flicker and hum of fluorescent lighting.

VEET AND IPART APPROVED

EMPYREAN'S LIGHTING ADVANTAGE

Empyrean Lighting's Corona™ LED panels are a commercially viable, efficient and effective alternative to traditional lighting technologies.

- Use 50% less electricity than fluorescent technology
- Lasts on average three times as long as fluorescent tubes
- Generates very little heat reducing loads on air-conditioning, lessens fire risk and improves safety
- Does not require a starter or ballast – further reducing energy use and fixture weight
- Contains no harmful or toxic substances and does not emit UV radiation

WHY CHOOSE CORONA™?

1. SUPERIOR QUALITY

All luminaires from Empyrean Lighting™ are stringently tested to meet several different certifications which include the RCM mark for Australia. Our components which include diodes and transformers are among the best worldwide. We stand by our Corona™ panels with a 3yr comprehensive warranty.

2. VISUALLY APPEALING & VERSATILE

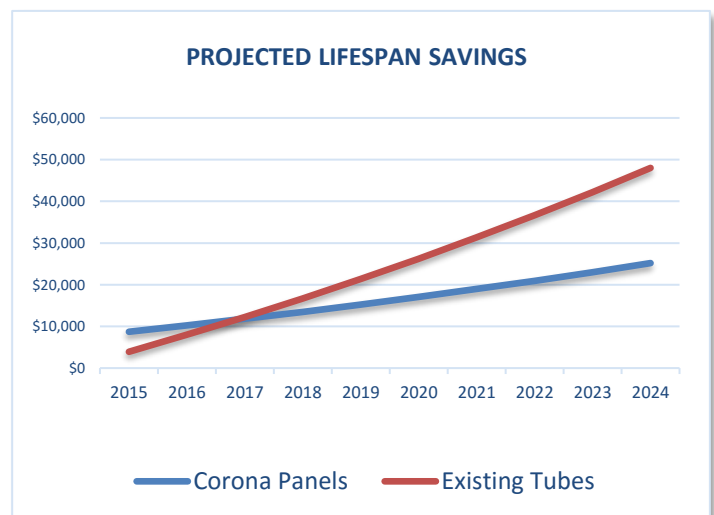

Our Corona™ panels are designed to mirror the performance of traditional lighting while providing a cleaner and more uniform look. The panels are extremely versatile and suitable for a variety of mounting options (including suspension and surface mount).

3. AFFORDABLE

High quality does not always come with a high price tag. Our panels cost little more than a traditional fluorescent troffer and present return on investment within 1 to 3 years of operation.

SUITABLE APPLICATIONS

Our Corona™ panels are perfect for any application where clean and modern lighting systems are desired. They are ideal for general lighting in commercial premises, universities and medical facilities. They also star in more complex and aesthetically advanced applications.

Example based on 18W T8s replaced by Corona 600mm panel operating in an office environment 30,000hrs a year using a number of variables and assumptions. Actual results may differ.
