

Case Study – Industrial Warehouse

Our Andromeda™ range requires little to no maintenance and is low in power consumption making them the ideal fit for industrial applications!

Busy warehouses that operate 12/7 or 24/7 require an efficient, low maintenance lighting solution that meets all required standards. Stopping production and conducting out of hours maintenance is costly and often not an option for industrial facilities.

Empyrean Lighting have installed over 10,000 Andromeda™ luminaires across an array of warehouses worldwide, including leading manufacture plants such as James Hardie Technologies, F Mayer & Visy.

Our Andromeda™ range has a proven lifespan of 60,000 hours (to L70B10) even when subjected to extreme temperatures and environments, and are purpose designed with external quick release drivers to ensure that change over is swift in the unlikely event that a driver fails.

This product series is extremely customizable, with 16 choices of IESNA lens types, 6 mounting options and are available in 3000K-5000K CCT.

Luminaires used to achieve lighting goal:

186 x AndromedaXPB Flood 180W units with 2 x hooks for suspension mounting

8 x AndromedaXPB Flood 110W units with 2 x hooks for suspension mounting

8 x AndromedaXPB Park 40W units fastened to wall with mounting adapters
